EVOLVING CARDBOARD

MADE IN SORANA

ROOTED IN THE PAST

PROJECTED TO THE NEXT

SINCE 1981

We were born in 1981 in Sora, the cradle of the Liri Valley and a territory with extraordinary qualities (*Sor*, **from the rock and water roots**). And it is above all the abundant water, brought by several rivers, that has allowed over the decades the installation of numerous factories, including paper mills, whose production cycle is driven by water power and in which water, precisely, is fundamental and the driving heart of the entire work process. This is where our dynamism, our experience, our industriousness come from: **A free flowing thought from which our insights emerge, to be always one step ahead.**

We take great care in selecting the best materials for our products and in finding solutions that respect the wonderful nature that surrounds us, to which we are grateful. In this way, we express our concrete origin and production of our product in Sora.

Our products are **Made in Sorana**, Made in Italy.

ITALIAN GENIUS

LARGE PRODUCTION CAPACITY

IN-HOUSE MOLD

We started the production of cardboard trays and discs in our paper mill in 1981. The growing development of our business has led us to be the leading Italian market player in our field, with an eye increasingly turned to the foreign market.

We have a cardboard thermoforming plant consisting of **over 40 presses** with the ability to produce **various conformations of trays and discs**. In-house mould making allows us to produce, in a short period of time, **customized projects** at the request of our clients or prospect clients.

Sorana
EVOLVING CARDBOARD

WHY WORK WITH US

- For the wide variety of solutions we can offer.
- For the solid expertise in what we do.
- For our vocation toward trend-setting innovation.
- For the impeccable quality of our products.
- For our variety, precision, and curiosity.
- For our rigorous quality control at every stage of the process.
- For our real commitment to sustainability.
- For our flexible approach to custom product development.
- Because we are rock. Because we are water.

WE CREATE

IN COLLABORATION

WITH NATURE

We are naturally innovative. Focused on the development of new circular economy production lines, **we analytically and steadily search for solutions from increasingly more natural materials**: Bio design products, inspired by nature and biological organisms, made as drivers of innovation to foster the transition to a better future. From nature, we receive continuous promptings to make our production more and more projected toward sustainable values. **From nature we receive, to nature we give.**

We aim to improve the competitive edge of manufacturing communities by supporting business initiatives by **sharing our knowledge and know-how** for the application and evolution of increasingly sustainable products.

We are pioneers in the growing discipline of bioproducts, which proposes **solutions to contemporary challenges** such as climate change, low-consumption production, massive waste of resources, increasing amount of waste, and depletion of natural resources, in favour of human and environmental health.

Sorana
EVOLVING CARDBOARD

PRODUCT RANGE

ESSENTIAL LINE

Our **ESSENTIAL LINE** consists of recycled cardboard trays, discs & boards. All products, totally recyclable, are laminated with food plastic films of different colours: gold, silver, black and pearl.

BIO LINE

Our **BIO LINE** line consists of two lines: **PURE PAP** and **PURE RESISTANT**.

PURE PAP

It's a line of **PAP** cardboard trays, discs and boards. PAP material is composed of **100% FSC pure cellulose, plastic-free, recyclable**, and certified for **direct food contact**. All products are suitable for **refrigeration** and for **heating in microwave and traditional ovens**.

PURE RESISTANT

Our **revolutionary line**, made of a single cardboard **100% pure cellulose FSC** with **extraordinary oil-repellent capabilities**, totally free of plastic and recyclable. Certified for **direct food contact**. All products are suitable for **refrigeration** and for **heating in microwave and traditional ovens**.

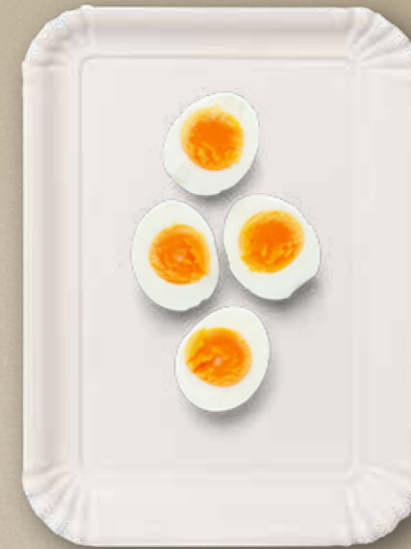

Sorana
EVOLVING CARDBOARD

ALIMENTARY

MULTIUSE

Ideal for direct contact with all kinds of food, our products introduce the **multiuse concept**. All that's left is for you to think about how to use them

What do all our products have in common? Food suitability, i.e., the **ability to be used with direct contact with food, of whatever kind or nature they are**. And from this characteristic comes yet another: **the multiuse**. We aim for cross-purpose and versatile use of our products in the food sector precisely to give you maximum choice with the same excellent characteristics.

We produce according to the **multiuse criteria**. We give you the possibility of **unlimited use**.

Sorana
EVOLVING CARDBOARD

ESSENTIAL LINE

EVERGREEN & CHIC

Sorana's historic line of recyclable trays, discs and boards. Thanks to the simple design, trendy colours, and perfect workmanship with which they are made, the products in the **Essential line** are ideal for the pastry and bakery sector, but can be used for any other food category such as dried fruit, caramelized fruit, and more.

Sorana

BIO LINE

PURE PAP

&

PURE RESISTANT

Sorana
EVOLVING CARDBOARD

SO NATURAL, SO PURE

From the care and respect for the nature that surrounds and inspires us comes our **BIO LINE**: our high-quality **sustainable product line**. The BIO LINE is divided into two product lines: **PURE PAP**, a pure cellulose line, and **PURE RESISTANT**, our revolutionary **oil-resistant and plastic-free line**. Pure PAP and PURE RESISTANT use **natural raw materials of 100% FSC pure cellulose and are recyclable**.

Naturally pure, suitable for direct food contact.

BIO

PURE PAP

PLASTIC FREE

RECYCLABLE

PURE PAP is our line of products made from **100% FSC pure cellulose**. All PURE PAP products are **plastic-free**, free of glues or chemical additives and suitable for **direct contact with food**. This feature, allows our PURE PAP products to be used with any kind of food, thus becoming perfect for take-out use. Suitable for **microwave and traditional heating and freeze**, they are **recyclable** and activate, therefore, a circular economy process of limiting the exploitation of the resources of our planet.

PURE PAP

EVOLVING CARDBOARD

What is more important than creating new products that are **1) of the highest quality** and **2) environmentally friendly?**

For us at SORANA, nothing is more important. Our every action, in fact, moves in this direction: respecting Mother Nature and pleasing the market and you with innovative solutions, surprising you.

Thus, was born PURE RESISTANT, the line of sustainable, food-grade, **recycling** products with the unique feature of being **plastic-free and oil-resistant**. No grease or oil is able to penetrate inside our products, *just as it happens with a ceramic product.*

Amazing, isn't it? After use you can reuse them if you want, just a wipe them with a sponge. Did we astonish you?

PURE RESISTANT IS

We just started a revolution

A paper that can repel 100% oil and grease? Yes, it now exists. Thanks to extensive research and studies, advanced experimentation and a lot of passion, we are now introducing you to our **PURE RESISTANT line** of high-quality sustainable products. **A real revolution in the field of paper products with extraordinary features.**

And with our revolution, your freedom of use begins.

Oil-resistant

Thanks to a special and revolutionary treatment of the raw material, our products incredibly do not absorb any kind of grease or oil present in food.

Plastic free

No chemical additives, glues or anything else is used in the production process. We use only what nature gives us, without altering it. We respect nature and man with a **totally natural product.**

100% recyclable

Respecting the Earth also means trying not to draw directly from its resources and therefore limiting its exploitation. Made of **100% pure cellulose**, the PURE RESISTANT line products, are recyclable and are therefore part of the sustainable process of the circular economy.

BIO

PURE RESISTANT

Trasversality and multiuse

Our PURE RESISTANT plastic-free and oil-resistant products, suitable for **microwave** and **conventional oven heating** and for **freezing**, are suitable for all kinds of foods, with an **extraordinary performance for all those rich in grease and oils such as fried foods, pizzas, pastas and dishes particularly heavy in sauces.**

But that's not all. They are also ideal for fresh pasta that stays perfectly dry, for soft cheeses or for dishes from oriental cuisines.

You can use them with any kind of food, **unleash your creativity!**
